Write your secret number here: _____

Next to all but one of the nodes, write an arbitrary integer. Next to the final node, write the number that makes the sum of all nodes equal the secret number.

- -

On this copy of the map: On each node, write the sum of that node and its neighbors. Cut or tear the paper on the dotted line. Give this second copy of the map to its owner so they can decrypt your message. Keep or destroy the first copy of the map from above.
